

Case Study: Automation Automatic Bill Of Material (BOM) Generation

Client Type :- Gratings Manufacture

Business Issue :-

- Manual calculate the number of components with quantities of each component in the
- drawing.
- Average number of components 150 with different quantity of each components.
- Client wants a automated process to avoid the repetition, counting errors & manual interaction.
- **How we help** :- Simple interactive program that user can handle it easily and get the correct BOM with relevant details
- Tool Used :- C# 2D CAD Software AutoCAD 2009

Silent Features :- User friendly, Easy to use

- **Benefits** :- Reduce time from from 20-30minutes to 1-2 minutes with accurate BOM generation
- Location :- India

Case Study : Inputs

Process By CTS:

- 1. Load the command
- 2. Select the drawing
- 3. Place the BOM
